

The studio is open and we are putting safety first. Studio visits are by appointment only. One client (and family member) will be allowed in the studio at any given time.

The Eastworks Building rules include entering and exiting thru the Marketplace entrance only and wearing masks in all common areas of the building. There is hand sanitizer on either side of the door as soon as you enter. The Marketplace entrance is where the RMV is.

Spending a little more time on the phone before your session instead of in-person is the best way for all of us to feel more comfortable. If anyone in your party or ours is ill, we will re-schedule at no additional charge. We will see no more than 3 clients per day. The studio space will be thoroughly sanitized and disinfected before you arrive. This includes all hard surfaces, chairs, tables, doorknobs ect. We have masks and hand sanitizer for your use if needed.

For indoor sessions the photographer will be wearing a mask. For outdoor sessions the photographer will remain a minimum of 6' away. We will also be using long lenses instead of getting close and we'll use no-touch posing methods.

Our hands are washed multiple times throughout the day and right before your session. We also use hand sanitizer before and after your session.

We want to provide a safe environment for all of us. Please let us know if you have any additional concerns.
